**Re:** South Beach Marina: G-Dock Update

---

Work on restoring G-Dock continues. The busy summer season has slowed construction progress on the dock and other maintenance and repair projects.

**G-Dock Update:**

Electrical work is now complete.  
Replacement water lines will be completed this week.

Upon completion of new water lines the fingers will be put back together. This will take some time but progress will be easy to see. The final stage will be installing new rub strips.

Thank you for your patience.
